-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Kokai 60-254432 in view of any of Kouchiyama et al (see paragraph 0115), Chaiken et al (see col. 2, lines 8-34) or Japanese document 2003-315,988 (see the abstract) essentially for reasons of record noting the following.

Applicant has amended the independent claims to recite the exact inorganic resist used. While the primary reference does use an inorganic resist, it is silent with respect to the composition of the resist. However, Kouchiyama et al discloses the exact same resist in paragraph 0115. Also, either of Chaiken et al or Japanese -988 discloses inorganic resists that include the instant metals and oxygen, and it is submitted that the exact composition of the resist would have been readily determined by one of ordinary skill in the art. Ie, it does not appear that the resist composition affords any particular benefit to the instant process and one of ordinary skill in the art would have been expected to determine suitable inorganic resists involving the instant tungsten and molybdenum metals. It would have been obvious to one of ordinary skill in the art to employ the inorganic resist taught in Kouchiyama et al, Chaiken et al or Japanese -988 to facilitate the recording process.

2.Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment concerning the inorganic resist has been noted and is submitted to be taught completely in newly applied Kouchiyama et al. Also, the rejection over Chaiken et al or Japanese -988 has been maintained, as these references show the same general incomplete oxide as an inorganic resist and it is submitted that the exact composition of this resist would have been within the skill level of the art.

3.Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

4.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on 571 272-1176. The fax phone
